How to answer the questions :

Each question will be followed by four alternative answers which are numbered as a, b, c, and d. You should select and show only one answer to each question considered by you as the most appropriate or the correct answer. Then, by using HB pencil (ordinarily used pencil) blacken the oval bearing the correct answer number against the serial number of the question. No mark will be given if more than one answer is marked for one question. Please note that the oval should be dark enough and should be filled in completely. For example, if the answer to Question Number 1 is 'b', it should be shown as follows :

1.

If you indicate your answers in any other way such as putting a tick-mark, cross-mark or a dot in the ovals, your answer sheet will not be evaluated. If you omit a question, which you find difficult, be sure that you mark the next answer against the right serial number of the question.

How to change your answer :

If you wish to change your answer, erase completely the already darkened oval by using good quality eraser and then blacken the new oval bearing your revised answer number. While changing the answer, erasing the earlier answer completely is extremely essential. If it is not erased completely, smudges will be left on the erased oval and the question will be read as having two answers and will be ignored for giving any mark.
